

Ovo su formule za opsege i površine koje učenici trebaju znati na kraju cjeline "Trokuti".  
Možemo ih isprintati i podijeliti da si zalijepe u bilježnice.

## Formule za opsege i površine

Zalijepi u bilježnicu i zapamti!!!

### pravokutnik

$$O = 2a + 2b$$

$$P = a \cdot b$$

### kvadrat

$$O = 4a$$

$$P = a \cdot a$$

### raznostraničan trokut

$$O = a + b + c$$

$$P = \frac{a \cdot v_a}{2}$$

### jednakokrračan trokut

$$O = a + 2b$$

$$P = \frac{a \cdot v_a}{2}$$

### jednakostraničan trokut

$$O = 3a$$

$$P = \frac{a \cdot v_a}{2}$$

### pravokutni trokut

$$O = a + b + c$$

$$P = \frac{a \cdot b}{2}$$

## Formule za opsege i površine
